

ONLINE SHOPPING SAFETY

Tips for this holiday season

PUBLIC WIFI

Avoid using public wifi when making purchases. Most public networks are unsecured and your info can be stolen

PROTECT YOUR \$
Only shop from sites with security enabled. The URL will always start with https://

SECURE YOUR INFO

Turn on two step authentication for bank accounts and credit cards

EMAIL SCAMS

Never click on a link from someone you do not know, even if it seems legitimate. This is how scammers can infect your computer and steal your information

DO RESEARCH

Read reviews. LOTS OF THEM. There are fake reviews, even on major sites, so be sure to read the positive AND negative reviews
